Introduction

All of **ROYAL CROWN Academy's** training programs and courses can be specially delivered to an organization as a corporate training programs or in-house training event upon re-quest. Additionally, The Academy organizes training events that are open to the public and consist of the most highly demanded training courses. Organizations are also allowed to send as many employees as they wish to these training events as long as the number does not exceed the quota.

ROYAL CROWN Academy® offers over a thousand training packages, including the internationally accredited and certified training programs. It can also create organization-specific solutions according to the needs and demands of corporate clients. The company has the flexibility and ability to revise an existing training according to the corporate client, and/or to design and develop a brand-new training from scratch.

The organizations that receive Corporate Training Consultancy Services from **ROYAL CROWN®** can request a certain training course to be revised specifically for them, or ask for a brand-new training program to be designed from scratch

About Us

Royal Crown for Training Technology established in 2015 year as a training and consultancy academy, it is not only register as head branch in Istanbul-Turkey but working as a main professional muscle behind international industrial estates and mega business units in Turkey, Iraq, Middle East, Egypt and UK.

Our history extends over several years, and our goal is always to develop people, it combines the originality and the long experience in addition to its commitment to use the modern techniques and the best training methods.

The social dimension was not absent from the philosophy and policy of the Academy therefore we interested in secure an open scientific and cultural center for our client.

Mission

Royal Crown for Training Technology aims to raise participation and attainment through high quality training, and according to the international standards, particularly in the training service and education sectors, which meets the needs and requirements of learners and employers by developing innovative training solutions with its partners.

Vision

Royal Crown for Training Technology is committed to excellence in all its business practices and operations. The senior management team promotes this business strategy.

Therefore, as far as possible, the company will work efficiently and effectively to ensure there is no harm to people, minimized effects on the environment and continued improvement in collective performance, individually, as a team and as **Royal Crown.** The company strives to exceed customers' expectations whether they are external or internal customers.

In order to achieve this goal, **Royal Crown** has embraced Quality Management and Excellence. The world's leading standards have been applied in this regard and the company's Integrated Management System serves as a platform to embed these principles across daily operations. This supports managers and helps them focus on critical activities in an organized and systematic manner so that the company consistently delivers improved performance.

Methodology

For long or short term, our organized programs will be applied meticulously to ensure there is an effective change and difference taking place with the learners. Our adopted approach via online training and virtual approach, that is based on active learning will take the learner in both directions, from practical to theoretical frames, resorting to both inductive and deductive approaches as key tools for the acquisition of knowledge and so many other skills.

Our learning environment adopts many activities and tasks like practical cases, role plays, debates, discussions, and exercises. Thus, learners can develop different perspectives and ways to approach an issue in question and comprehend its overall dimensions and implications.
Also, short training workshops and study days are held for few hours and might extend to few days, these seminars are planned to adapt to learners' challenges. They are conducted in various ways, in-house or public, standard or tailored in the academy or in our client facilities. Standard based programs are more focused on the market needs as studied by the training organizer.
The said programs can be conducted either in house or in a public sphere. In the case of in-house delivery of the service the training session and the professional trainer in charge will still be based on appropriating the programs rhythm and developments to the targeted group of learners.

Training Methods

Employee training is one of the most critical parts of the employee experience. When a new employee starts, they're a sponge, ready to absorb information about your company, Your policies and procedures, and their role and responsibilities. Existing employees also need ongoing training to learn new skills, improve existing ones and continue to grow over time

Technological advancements have revolutionized the training industry, giving managers more training method options than ever. Companies now have access to all kinds of digital tools like training videos and computer-based training, and can still leverage tried-and-true methods like traditional classroom training.

We provide four types of training methods:

1 Instructor-led training

Instructor-led training is the traditional type of training that occurs in a classroom, with a teacher presenting the material. This can be a highly effective method of employee training, especially for complex topics. Instructors can answer specific student's questions or direct them to further resources. They also allow for highly-skilled instructors to match the training level and style to the employees in the room.

2 E-learning

It's one of the easiest types of employee training to roll out to larger populations, especially for employees who are remote or have high-turnover rates. With interactive games, tests, videos, activities, it can also go a long way towards keeping your employees engaged with the training.

Of course, Learning also has its own challenges. Without a solid instructional design strategy behind it, the graphics and visuals that make Learning fun can also make it gimmicky. Keeping it up-to-date is also a necessary best practice for us.

3 Virtual Reality

Simulation training is most often provided through a computer, augmented, or virtual reality device. simulation training can be a necessary option for employees in riskier or high-stakes fields.

This type of employee training is also highly-effective and reliable, allowing employees to progress consistently and at their own pace.

4 Hand-on

Hands-on training includes any experiential training that's focused on the individual needs of the employee. It's conducted directly on the job. Hands-on training can help employees fit perfectly into their upcoming or current role, while enhancing their current skills.

Royal Crown

International
Accreditations

NEBOSH-UK

National Examination Board in Occupational Safety and Health

nebosh

Accredited Centre
1342

NEBOSH is a leading global organization, which provides health, safety and environmental qualifications. Their internationally recognized qualifications help to raise the competence of safety and environmental professionals as well as individuals at all levels in the work-place.

Since their inception in 1979 over 400,000 people from around the world have gained a **NEBOSH qualification**. Tens of thousands join their number every year studying with Their network of 600 Learning Partners in over 132 countries. Their qualifications are highly respected by governments, employers and our learners. They build the knowledge and skills which underpin competent performance as a health, safety and environmental professional.

IOSH

The Institution of Occupational Safety and Health

Accredited Centre
3478

Formed in 1945, **IOSH** has become leader of a profession that has transformed the world of work, making it a safer, healthier place to be. It is a status identified by business and why Chartered Membership of **IOSH** is recognized worldwide as the hallmark of professional excellence in workplace safety and health.

IASP–NASP USA

National Association of Safety Professionals

National Association Of Safety IASP Professionals

National Association Of Safety NASP Professionals

IASP / NASP initially offered workplace safety in-house training on a contract basis to business and industry, train-the-trainer courses for safety professionals, specialized training for those responsible for **OSHA** compliance and safety in the workplace, and consultative services to business and industry. Independent study courses were developed to allow those who could not attend classroom courses to still receive **NASP** training. **IASP/ NASP** now provides professional certifications, classroom training, site-specific training as well as a full array of safety and environmental consulting services.

ASP / NASP differentiates ourselves from our competitors with our style of training. They truly have been the innovators in the **NASP** Method of **EHS** Training which emphasizes andragogical (training adults) methodologies for interactive and dynamic training that stimulates student interaction and ensures knowledge retention.

Training is available for general industry, construction, oil and gas, and governmental agencies.

Highfield-UK

Highfield

awarding bogy for compliance

They're a global leader in compliance and work-based learning and apprenticeship qualifications and one of the UK's most recognizable awarding organizations.

LEEA

The Lifting Equipment Engineers Association

ACCREDITED TRAINING COMPANY

LEEA is established across the world as the leading trade association for all those involved in the lifting industry.

Their members work in every aspect of the lifting industry, from design, manufacture, refurbishment and repair, through to the hire, maintenance and use of lifting equipment.

Their Association has played a key role in this specialized field for over 75 years, from training and standards setting through to health and safety, the provision of technical and legal advice, and the development of examination and licensing systems

They represent their members at the highest levels across a range of both public and private bodies, including government departments as well as nationally and internationally recognized professional and technical institutions.

IADC

IADC is a non-profit trade association that is the global leader in advancing the drilling industry. They are recognized worldwide for our accreditation programs, conferences, advocacy efforts, and industry news.

IADC is the forum of oil & gas drilling industry stakeholders to connect, share knowledge, tackle common problems, and develop solutions to critical issues.

TM

The International Well Control Forum (IWCF) is the only independent body focused on oil and gas well control training, accreditation and certification.

They set training standards through a global network of branches and are committed to delivering a permanent step change in process safety and operations throughout the life-cycle of the well.

Through collaboration with industry, they are helping to increase competency and change behavior.

CERTIFICATION SCHEME
CSWIP
FOR PERSONNEL

Established in 1969 as the **Certification Scheme for Weldment Inspection Personnel, CSWIP** provided a standardized approval of proficiency. Commencing with an assessment of the proficiency of ultrasonic inspection personnel, and then adding radiography, **CSWIP** rapidly gained nationwide recognition and acceptance by industry as assurance of inspector competence. With broad industry stakeholder engagement and strict adherence to the requirements of standards, the quality and reliability of **CSWIP** led to employers and their customers specifying it as a prerequisite for inspectors. The **CSWIP** certificate was established as a valued possession.

API

American Petroleum Institute

energy API

API represents all segments of America's oil and natural gas industry. Its more than 600 members produce, process, and distribute most of the nation's energy.

formed in 1919 as a standards-setting organization. In its first 100 years, **API** has developed more than 700 standards to enhance operational energy and environmental safety, efficiency and sustainability.

Although our focus is primarily domestic, in recent years our work has expanded to include a growing international dimension, and today **API** is recognized around the world for its broad range of programs.

API also certifies inspectors of industry equipment through Their Individual Certification Programs,

Designed to recognize working professionals who are knowledgeable of industry inspection codes and are performing their jobs in accordance with those codes. Through their Witnessing Programs, **API** provides knowledgeable and experienced witnesses to observe critical material and equipment testing and verification. **API's** Training Provider Certification Program provides third-party certification for a variety of oil and gas industry training courses, further ensuring that any training provided meets industry needs.

TWI

A global leader in technology engineering providing research and consultancy to its members. Respect for its expertise, professionalism, impartiality and confidentiality, **TWI** works with the most influential companies worldwide across all industry sectors.

With centers all around the globe, **TWI** is the world's largest provider of welding technology and inspection related training for individuals and companies alike.

PMP®

Their professional resources and research deliver value for more than 2.9 million professionals working in nearly every country in the world to enhance their careers, improve organizational success and further mature the profession.

Their worldwide advocacy for project management is reinforced by our globally recognized standards, certification program, extensive academic and market research programs, chapters, and our volunteer and professional development opportunities. They offer eight certifications that recognize knowledge and competency, including the Project Management Professional **(PMP)®** certification - renowned as the global gold standard. Salaries and career opportunities for **PMPs** show that employers recognize the value delivered by trained practitioners.

Reliability and Integrity of Certificates

When it comes to the reliability and integrity of certificates, Royal Crown Academy stands as a paragon in the training industry. We understand the importance of ensuring that our certificates hold true value and are recognized as a mark of excellence. To achieve this, we have implemented rigorous processes and protocols to guarantee the authenticity and credibility of our certificates. Our training programs are designed and delivered by training experts who possess extensive knowledge and experience in their respective fields. Additionally, we adhere to recognized standards and guidelines to ensure that our training programs meet the highest quality standards. We conduct thorough assessments and evaluations to ensure that learners have acquired the necessary skills and knowledge before awarding our certificates. Moreover, our certificates bear unique identifiers and are securely stored in our database, providing an added layer of security and preventing any fraudulent activities. By upholding the reliability and integrity of our certificates, we instill confidence in our learners, employers, and stakeholders, allowing them to trust in the value and credibility of our training programs.

Modern Training
Environment
According to the International Standards

International standards provide guidelines and best practices for creating a modern training environment that is effective, efficient, and compliant with quality and safety requirements. Here are some key considerations for a modern training environment in accordance with international standards:

- **Facilities and Infrastructure**
- **Equipment and Technology**
- **Training Materials**
- **Qualified Instructors**
- **Curriculum and Learning Objectives**

Strategic International
Partners

Quality of Training

At Royal Crown Academy, we pride ourselves on delivering high-quality training programs that empower individuals and organizations to reach their full potential. Our commitment to excellence is reflected in every aspect of our training, from the knowledgeable and experienced instructors we employ to the comprehensive and up-to-date curriculum we offer. We understand that effective training is a combination of engaging content, interactive learning experiences, and practical application, which is why we prioritize hands-on activities and real-world case studies in our programs. With a focus on continuous improvement, we regularly evaluate our training methods and incorporate feedback to ensure that our participants receive the most relevant and impactful training possible. At Royal Crown Academy, we believe that investing in quality training is the key to unlocking success and driving lasting change

ISO Certifications

At Royal Crown Academy, we take immense pride in being ISO certified, a distinction that sets us apart in the training industry. This certification showcases our unwavering commitment to delivering exceptional quality, driving continuous improvement, and prioritizing customer satisfaction. By adhering to the rigorous standards set by ISO, we have established robust management systems that streamline our processes, enhance efficiency, and reduce waste. This not only ensures that we consistently deliver high-quality services but also allows us to identify and manage risks effectively. With ISO Certification, we have gained enhanced credibility and reputation, enabling us to access new markets, secure business opportunities, and forge strong relationships with our customers, partners, and stakeholders. Moreover, ISO Certification has instilled a culture of employee engagement and continuous improvement within our organization, fostering an environment that encourages innovation and excellence. We are proud to be ISO certified as it demonstrates our unwavering commitment to excellence, customer satisfaction, and sustainable business practices
